**Choose the correct answer *a, b, c* or *d*.**

Greenhouse gases and their deadly effects

For ages, people have burnt coal, oil and gas and this has produced carbon dioxide, methane and nitrous oxide. The ‘greenhouse gases’ have stopped the heat of the sun from leaving the earth’s upper atmosphere leading in time to many shocking changes of life on earth. For example, scientists found that half of the 24 species of butterfly they’ve studied in Australia would soon become extinct. 60% of the species in the Kruger National Park in South Africa would also die out, and more than 100 of the 300 South African plant species would also become extinct. One of the plants in danger of extinction is the national flower of South Africa, the King Protea.

1. What substances produce ‘greenhouse gases’ when burnt?  
a) Wood and coal.  
b) Plastic, oil and coal.  
c) Oil and coal.  
d) Coal, oil and gas.
2. How many species of butterfly would become extinct?  
a) 24  
b) 12  
c) 60  
d) 30
3. Which is the percentage of South African plant species that would also become extinct?  
a) 30%  
b) 45%  
c) 33%  
d) 37%

**Choose the correct answer *a, b, c* or *d*:**

Canada

The roots of Canadian English can be found in the events which followed the American Revolution of 1776. Those who had supported Britain found themselves unable to stay in the new United States, and most went into exile in the Ontario region of Canada. From there they spread to all parts of the country. They were soon followed by many thousands who were attracted by the cheapness of land. Within fifty years, the population of Upper Canada (above Montreal) had reached 100,000 - mainly people from the United States.

1. Where in Canada did the first immigrants go?
  - a) In Quebec.
  - b) In the Ontario region.
  - c) In Montreal.
  - d) In Upper Canada.
2. Why did some English people have to escape to Canada immediately after the American Revolution?
  - a) Because they had supported Britain.
  - b) Because they liked Canada.
  - c) Because they had no other place to go.
  - d) Because they went into exile.
3. Why did people go to Canada after the first immigrants?
  - a) They had to go into exile.
  - b) They thought of a better future.
  - c) They followed their families.
  - d) They found cheap land.

**Choose the correct answer *a, b, c* or *d*:**

Science and technology in schools

Science is no longer presented as Physics, Chemistry and Biology to be learnt parrot fashion, but as a practical discipline requiring communication skills and the application of knowledge and understanding. They learn to communicate, whether working alone or contributing to a group effort. They learn research skills such as the use of reference materials. They practice gathering and organizing information from different sources.

Technology, which was previously encountered as an option at Secondary School and often limited to Technical Drawing, is now compulsory for pupils aged between five and sixteen. As in Science, the new approach is based on practice. Pupils are encouraged to identify opportunities for design and technological activities and to express them verbally.

1. How is science regarded nowadays?  
a) as a way of communicating  
b) as a fashion  
c) as a practical discipline  
d) as a technological issue
2. What do students learn through scientific subjects?  
a) how to communicate  
b) how to learn parrot fashion  
c) how to translate  
d) how to speak in front of an audience
3. When is technology compulsory in a child's education?  
a) at Secondary School  
b) from the age of five to sixteen  
c) at Primary School  
d) never
